RECENT PROJECTS

Personal Web Portfolio

Website designed and built from scratch as the capstone project for my JavaScript immersive course, featuring coding projects I've completed as a student.

Built with: HTML5, CSS3, JavaScript, jQuery, Bootstrap, Heroku, Webpack, Node.js, Handlebars, Three.js, D3, Git + GitHub, Flickr API, SVG, Sublime Text

Library App

Library app using the prototype property in JavaScript. Users can add and remove books, find books by title or author, get random books, or display a list of all authors.

Built with: HTML5, CSS3, JavaScript, jQuery, OOP, Bootstrap 4, Git + GitHub, SourceTree, Atom

Todo App

Class project using multiple libraries and frameworks. Our first build used jQuery, our second, Backbone, and we refactored a third time using React.

Built with: JavaScript, jQuery, MVC, Bootstrap, Backbone, React, Ajax, API, JSON, Git + GitHub, Webpack, Heroku

SKILLS

Web:

HTML5

CSS3

JavaScript

jQuery

Bootstrap

Git + GitHub

SourceTree

Command Line
